

F04699

MARINE MEMOKEY

DESCRIPTION

- Telephone-type keypad that allows the door to be opened by entering a previously programmed code of up to 6 digits.
- Autonomous access control system. For installations in which simple access control is required, without recording incidents, to complement the electronic intercom and allow neighbors access to the building, for example: offices, small offices, garages.
- Includes Marine ST1 flush box ref. 4641. Measurements in mm (width x height x depth: 130 x 184 x 96)
