

F05190

CITY WIEGAND KEYPAD READER

DESCRIPTION

Digital keypad that allows the door to be opened by entering a previously programmed 4 to 6 digit code in the central controller, necessary for its operation. City is the "continuous profile" street sign line. This new plate model is more robust, more luxurious and of greater aesthetic and functional quality. It is characterized by its curved-convex profile while maintaining the same characteristics as its predecessor. There is total compatibility between both models, ensuring immediate replacement and replacement. They are made of anodized aluminum, highly resistant to weather and climatic changes. It incorporates new materials such as chrome plated Zamak in testas and push buttons. Aluminum color

Wiegand keyboards allow the access control installation to provide anti-sabotage security by not incorporating the door opening mechanism or the exit button connection. These functions are supported by the external controller. They can be used with door controllers that use the Wiegand-8 or 4-bit burst protocols.

Centralized access control system. For installations that require code change by PC or event log. Requires an external centralized controller such as AC-MAX or WIEGAND 1 DOOR WIFI MINI CONTROLLER (Ref. 5193) . Depending on the controller where this wiegand keyboard is connected, it must be set to 4 or 8 bits burst.
