# CITYLINE PROXIMITY READER

## DESCRIPTION

* Reader that allows the door to be opened when a remote key fob or card is used. Only authorised cards or key fobs will activate the device. Physical contact is not necessary.
* Proximity reader that uses an incorporated dipswitch configuration (SW2) and can function with an autonomous or centralised system.

**AUTONOMOUS** configuration.
* Capacity for up to 400 user cards or key fobs.
* Reader and controller integrated into the same module.

Configuration as a **CENTRALISED MDS-AC Plus**.
* Proximity reader with capacity for up to:
- 1020 user cards/key fobs with the central MDS unit (ref. 2405).
- 2048 user cards/key fobs with the central AC Plus unit (ref. 4410).
* Reader and controller integrated into the same module.

**CENTRALISED** configuration with the Wiegand 26 or Data/Clock protocols.
* When the reader starts in the following modes:
- Wiegand-26, the + LED will light for one second.
- Data/Clock, the - LED will light for one second.
* Proximity reader with capacity for up to:
- 1020 user cards/key fobs with the central MDS unit (ref. 2405).
- 2048 user cards/key fobs with the central AC Plus unit (ref. 4410).
* Requires the door controller (ref. 4420) for connection and functioning.

* Acoustic and visual confirmation via LEDs which indicate whether the presented card has been accepted or rejected.
* Integrated into an aluminium plate.
* Either embedded (ref. 8948, including box) or surface mounted (ref. 7061, optional).
* Recommended for indoor and outdoor use.
