

F08948

CITY FLUSH BOX FOR KIT (S1)

DESCRIPTION

- In order to install a panel it is necessary to place a box in the wall where we will subsequently fix the panel.
- The flushboxes are manufactured in plastic, with hinges which can fold in any direction, allowing to hold the panel still during the wiring procedure. They have circular marks at the bottom of the box which can be easily pierced with a slight pressure, allowing to make the way for the cables to go through.
- If several outdoor panels are combined, always from the same series, it is not possible to use a joining bolts set (order no. 8829) for perfect coupling in this flush box model. Instead, size S1 flush boxes with ref. 8851 must be used for this purpose. One set of ref. 8829 is required for each additional outdoor panel to be installed between the flush-mounted boxes ref. 8851.
- Available in all the series. Select the box of the necessary series depending on each case.

Technology: GENERICA

Measures of the product: 115x114x45 mm

Weight: 0.091 kg

Measures of the packed product: 5x11,5x11,5 cm

EAN 13: 8424299089485
