

F05232

KEYSINGLE PLUS4 REMOTE CONTROL

DESCRIPTION

- This device allows the opening of doors and barriers, remotely from people or vehicles through an RF radio transmitter. With a single issuer you can manage all the doors you want, both in stores, garages, single-family homes and in neighboring communities. The RF transmitter has the encryption system and changing code that gives us maximum security per user and reaches a distance of up to 100 meters. In addition, it has the exclusive APS system that allows an activation of the automation from a greater distance, since, when activating the transmitter, it is emitting for 15sg until the receiver receives it. The transmitter can be activated even if it is out of coverage and it will repeatedly transmit the signal while the user approaches his garage door and until the moment of opening the door.
- 868Mhz radio frequency transmitter programmable with security code to carry the identifier next to the traditional keys. Each device has the identifier marked to register it in the system (with unique identifiers).
- It has 4 buttons to activate the door opening, from one to four doors or activate from one to four remote devices.
- Indicative LED for pulsation and verification of internal battery operation.
- Each issuer has the identification code marked on the remote.
- It is necessary to register the command code in the receiver.

TECHNICAL SPECIFICATIONS

Approximate battery life of 2 years.

Technology: NO PE/VP

Measures of the product: 68(V)x35(H)x14(P) mm

Weight: 0.044 kg

Measures of the packed product: 6,9x4,6x1,5 cm

EAN 13: 8424299052328
