Product Code

FE08983

CITY S-10 FLUSH BOX

Reference

8983

EAN

8424299089836

Description.

Description

- To install a plate it is necessary to place a box on the wall or wall where we will later fix the plate.
- The embedding boxes are made of aluminum and zamak. They have hinges that can be folded in either direction, which allow the plate to be held while wiring is being carried out. They have circular indentations in the bottom of the box, which are pierced with a slight blow or pressure, thus allowing the passage of the cables.
- In the event that several plates are combined, always from the same series, it is necessary to use a set of spacers for a perfect coupling. One set is required for each additional plate installed between the wallboxes.
- Available in all series. Select the box of the necessary series, according to the case.

Technical Details

Built-in box measurements: 115x471x45 mm (width-height-depth).
