

Everything matters

What you see matters.
What you don't see matters too.
Every detail in its place.
Iris. Everything matters.

There is beauty that captivates. And beauty that accompanies you.
It respects the space around it. It remains silent, yet always present.
It doesn't need attention, only intention.

This is what defines our **Iris terminals.**

Harmony is created **when shape and function work as one.**

When there is no more and no less.

When everything is in perfect balance.

Minimalist aesthetics.

Rounded, clean lines designed to blend harmoniously into any home.

Premium gloss finish.

Monitors manufactured from high-quality ABS plastic with a gloss finish that enhances elegance and purity.

Ultra-slim profile.

Just 19 mm thick when wall-mounted, ensuring seamless architectural integration.

Superior audio quality.

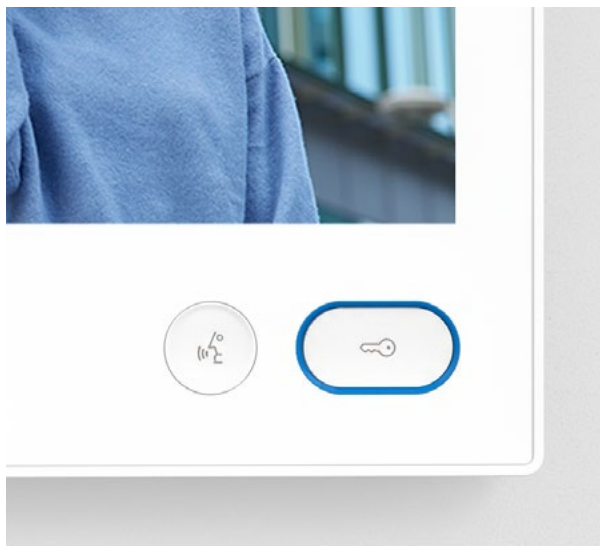

Optimised audio system for clear, natural communication.

Hidden backlit icons.

Notification LEDs remain invisible when switched off and illuminate with an elegant white light when activated.

Flat mechanical pushbuttons.

Minimalist appearance, while preserving the durability and reassuring feel of mechanical buttons.

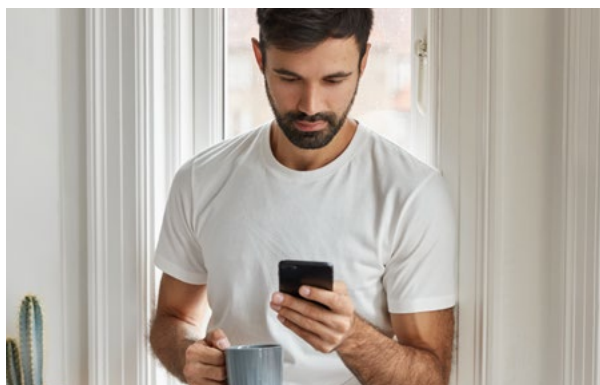

Brand identity.

The door-opening button once again becomes the centre of our visual identity. Staying true to our heritage, the iconic blue colour has evolved into an elegant ring surrounding the button, making a Fermax monitor instantly recognisable.

DuoxMe connectivity.

The entire Wi-Fi Iris range allows you to answer calls from your mobile via the DuoxMe App. Free and unlimited call divert included as standard.

Photocaller security.

The monitor automatically captures an image of the visitor, allowing calls to be viewed both on the monitor and on a mobile via the app. (Image capture can also be activated manually on 7" monitors, if preferred).

Accessibility for all.

Committed to inclusion, we offer models with an integrated induction loop as standard, making communication easier for people with hearing impairments.

Essence is a choice, too.

When design respects balance and technology is shaped around wellbeing, your home feels different.

Our indoor monitors are more than just devices; they are a connection between you and your home.

Telephone.

7" Iris Smart Wi-Fi

MONITOR

Intelligence takes on
a new dimension.

Designed for the most distinctive projects. The Iris Smart monitor goes beyond the concept of a video intercom to become the true control centre of the home.

technology

Premium design

Available in **black or white**, blending perfectly into any interior.

Ultra-slim profile with impeccable design.

High-performance processor, ensuring optimum speed and responsiveness.

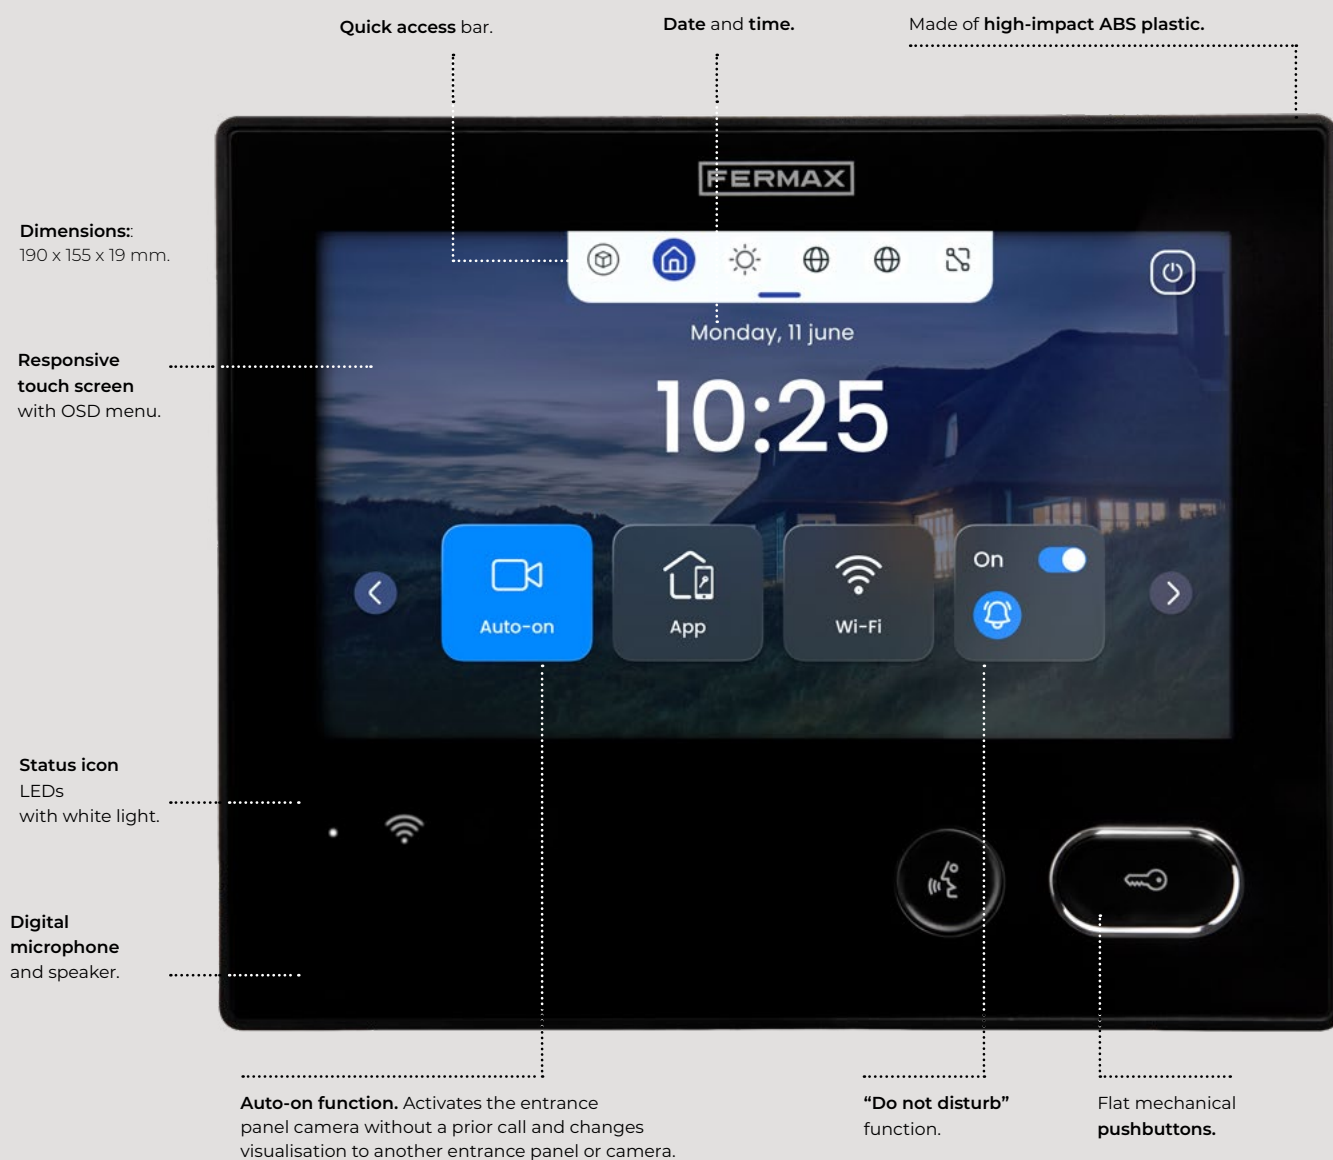

7" responsive touch screen with instant response to multi-touch gestures.

Door-opening button with an **exclusive chrome ring**.

7" IRIS SMART WI-FI MONITOR

Technology designed around the essential features that make all the difference.

Dimensions: (width) x (height) x (depth) mm.

Capacitive touch screen with a customisable interface: icons can be added, removed or rearranged.

Audio system with a digital microphone and speaker for a natural, interference-free voice, ensuring crystal-clear communication.

Manual or automatic image and video capture from the monitor or mobile.

Intercom function. Enables simple and direct communication between monitors installed within the same home (up to 3).

User experience. Choice of melodies (up to 7 options). Timed “do not disturb” function. Configurable F1 and F2 function buttons to activate a second entrance, courtesy lighting and more (Duox Plus relay required). Adjustable call and conversation volume. Integrated apartment entrance doorbell, with no additional devices required.

Real-time web browsing to access live information (weather, traffic, etc.) or connect to home automation servers.

Wi-Fi as standard. Connectivity is integrated directly into the monitor, including the free and unlimited DuoxMe call divert to mobile service.

IP camera visualisation. Up to 4 IP cameras with RTSP streaming. Digital video peephole function.

Doormatic function. Allows the door to be programmed to open automatically whenever a call is received.

Your home under control

One screen for everything that matters, delivering a truly integrated solution with fast, intuitive navigation.

Web browsing.

Access to **real-time web content**.

Up to five configurable areas for displaying web pages (booking systems, weather forecast, traffic updates, etc.) directly on the monitor screen.

Elegance
and technology
in **perfect harmony.**

Designed to work together.

Iris and Cora share the same vision: transforming communication within the home through thoughtful design, an intuitive experience and more advanced technology. Together, they create a solution that naturally connects indoors and outdoors, delivering security, comfort and an aesthetic that integrates perfectly into any environment.

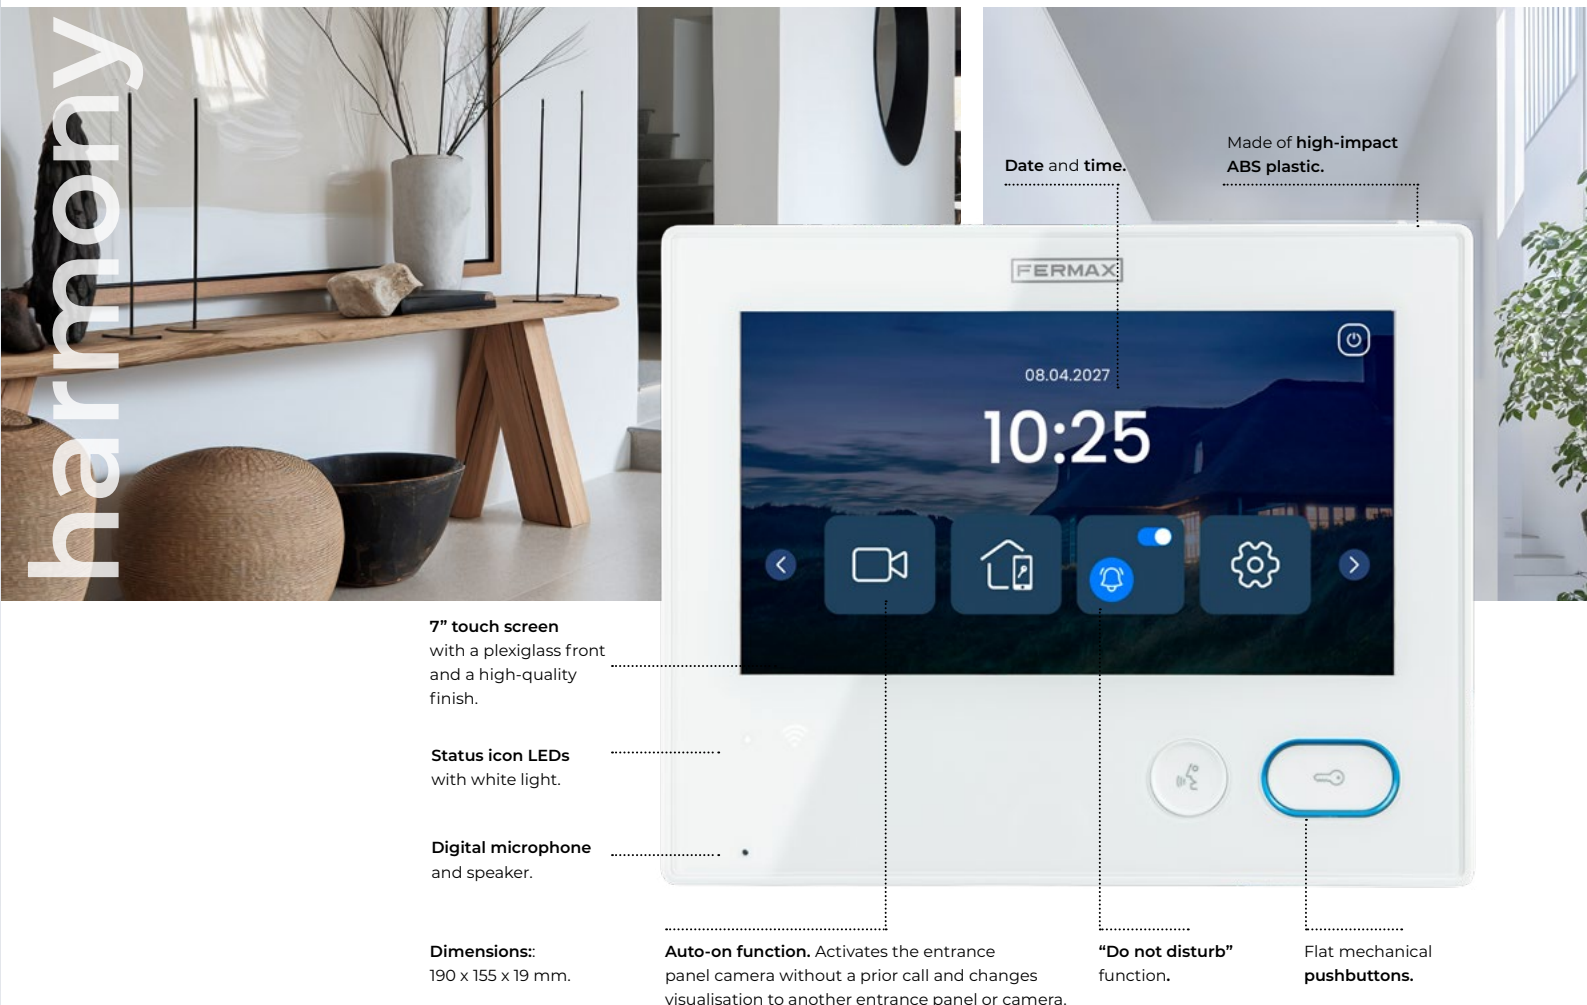

7" Iris Wi-Fi

MONITOR

The **elegance** of
being intuitive.

New user interface with touch icons, smooth animations and an optimised visual design.

Digital MEMS microphone. Clear voice capture, free from interference and vibrations.

Manual or automatic image capture from the monitor or mobile.

Doormatic function. Allows the door to be programmed to open automatically whenever a call is received.

Wi-Fi as standard. Connectivity is integrated directly into the monitor, including the free and unlimited DuoxMe call divert to mobile service.

Intercom function. Enables simple and direct communication between monitors installed within the same home (up to 3).

User experience. Choice of melodies (up to 7 options). Timed "do not disturb" function. Configurable F1 and F2 function buttons to activate a second entrance, courtesy lighting and more (Duox Plus relay required). Adjustable call and conversation volume. Integrated apartment entrance doorbell, with no additional devices required.

4.3" Iris hands-free

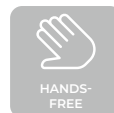

MONITOR

The **simplest** way
to feel at home.

Two versions:
Wi-Fi and non Wi-Fi

balance

Made of **high-impact ABS plastic**.

4.3" screen with a plexiglass front and a high-quality finish.

Auto-on function. Activates the entrance panel camera without a prior call and changes visualisation to another entrance panel or camera.

Flat mechanical **pushbuttons**.

MEMS microphone.

Dimensions:
127 x 165 x 19 mm.

Date and time.

Mechanical buttons for easy interface navigation.

Status icon LEDs with white light.

New user interface with digital icons controlled via four direct-access buttons. Advanced features and an optimised visual design.

Digital MEMS microphone. Clear voice capture, free from interference and vibrations.

Automatic image capture from the monitor or mobile.

Doormatic function. Allows the door to be programmed to open automatically whenever a call is received.

User experience. Choice of melodies (up to 7 options). Timed "do not disturb" function. Configurable F1 and F2 function buttons to activate a second entrance, courtesy lighting and more (Duox Plus relay required). Adjustable call and conversation volume. Integrated apartment entrance doorbell, with no additional devices required.

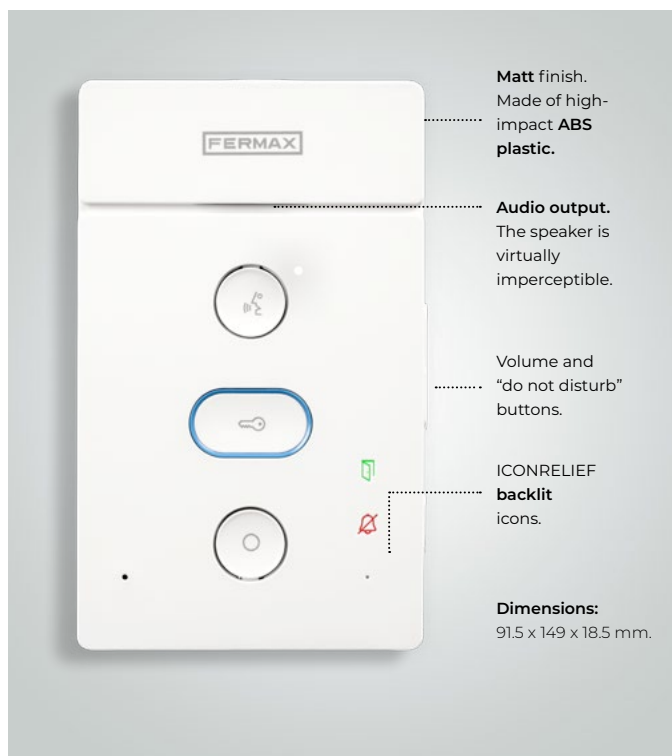

Iris hands-free

TELEPHONE

The **essence** of **simplified** communication.

Backlit, low-relief icons integrated directly into the moulded material, ensuring durability and a clean design.

Doormatic function. Allows the door to be programmed to open automatically whenever a call is received (activation is indicated by a green LED).

Intuitive control with three front buttons for the main functions (answer/end call, door opening and activation of an additional function) and three side buttons for volume adjustment and activation of the "do not disturb" mode.

Easy installation: Simplified installation using a wall connector.

Auto-on function. Establishes audio communication with panel 0 in the same block. Activation is indicated by a white LED.

Technology without sacrificing the ergonomics and convenience of pushbuttons for the most universal functions, talking and opening the door.

Dimensions: (width) x (height) x (depth) mm.

A connected home

Call divert to mobile.

2-wire technology that redefines efficiency.

Less time, fewer errors, maximum efficiency.

- The only 100% digital system in 2 wires with fewer installation components.
- Installation using existing wiring, ideal for refurbishment projects.
- Suitable for a wide range of residential and business sector projects.

From small installations to large-scale projects.

- Suitable for both vertical structures and horizontal installations.
- Supports multiple entrances and complex configurations.
- High capacity: up to 100 blocks and sub-blocks, and up to 10 panels and 10 guard units per building.
- Smart accessories to expand the system as required.

Configuration is as easy as installation.

- Intuitive digital programming from the monitor in seconds.
- Panels configurable via web server (Cora) or voice-guided setup.

Digital technology that ensures consistent quality.

- Full Digital transmission with no signal loss.
- The only 2-wire system with 2 communication channels within the same block.
- Maximum point to point distance without regeneration: 500 m.
- Maximum distance between extremes of the installation: 3.000 m.

Total control, from anywhere.

- Connectivity available on all Wi-Fi monitors.
- Digital technology that supports smarter and more convenient communication.
- Connectivity that integrates naturally into everyday living.

Sustainable and responsible technology.

- Manufactured in Spain using production processes that reduce environmental impact.
- Efficient installation requiring less time, fewer site visits and reduced resource consumption.
- Durable and scalable system, designed to extend the installation's lifecycle.
- Solutions that contribute to more efficient and responsible building management.
